

*“Operators can use Nova<sup>QC</sup> as we have the technical, marketing and business case expertise to help you to achieve your company’s vision using the most cost effective solution.”*

## Nova<sup>QC</sup> Network Migration

**Nova<sup>QC</sup> have worked with a range of international telecommunications network operators to help them with their Network Migration to a Next Generation IP based network.**

### Background

A European Operator embarked on a NGN transformation project which included migrating all of their voice subscribers from their TDM switch network to a Softswitch network.

### Scope

The Operator identified their need for specialist expertise to help their company in the:

- detailed planning of their network changeover
- how to replicate services from one network to another
- understanding the timescales for undertaking the transfer

To enable them to do this the company contacted Nova<sup>QC</sup>

### Result

Nova<sup>QC</sup> were able to supply a team of five of our experienced consultants to undertake the role.

Our consultants worked with the Operators transformation team and used their knowledge of a number of similar transformation projects to provide a design which:

- Optimised their existing copper network
- Deployed a new Fibre network to provide connectivity to in-service and new basic points etc.
- Deployed LTE to rural locations

### What we can do for you?

Why not contact Nova<sup>QC</sup> and let us help you with your:

- Business Case Modelling
- Implementation of Plans & designs
- Vendor Appraisal
